separation of microorganisms by flotation - aemm - separation of microorganisms by flotation il. flotation of spores of bacillus subtilis var. niger1 a. mudin,2a. l. mular,3andr. f. o'connor3 departmentofmetallurgy, massachusettsinstitute oftechnology, cambridge,massachusetts received for publication august 10, 1959 separations of various microorganisms from water byflotation havebeen reported byboyles and lincoln

centenary of flotation symposium - nanoparticles - minerals float using a number of flotation techniques, including contact angle measurements, it was gaudin and his colleagues at the university of utah/u.s. bureau of mines who systematically investigated the function of reagents on the flotation behavior of pure minerals, during the period, 1926 -1929. a.m. gaudin in 1935 at the **flotation low-grade gold ores** - to a.mudin,flotation testing bybatchesiswidespreadbecause it predicts in a broad waythe results of plant operation. hesays that, in flotation work, the agreement of large-scale operation with laboratory tests is muchbetter than the agreement between large-scale operation and miniature-scale tests in most chemical,
